1285
AVENUE OF THE AMERICAS

GENERAL DESCRIPTION

ADDRESS
1285 Avenue of the Americas
(Sixth Avenue), New York, NY 10019

Block: 1004 / Lot: 29

(a/k/a: 1281-1297 Avenue of the Americas)

YEAR BUILT
1960

ARCHITECT
Skidmore, Owings & Merrill

DEVELOPER
The Equitable Life Assurance Society of the United States

BUILDER
Tishman

DIMENSIONS
The building is 513 feet high. It occupies the entire western block of Sixth Avenue, between 51st and 52nd Streets. Approximately 200 feet along Sixth Avenue, 400 feet along 51st Street.

BUILDING AREA
1,792,186 square feet

RETAIL ESTABLISHMENTS
Chop't, NAYA, Gateway Newsstand, Mastro's Steakhouse

TRANSPORTATION
Conveniently located within walking distance of Pennsylvania Station, Grand Central Station, the New York Port Authority Bus Terminal, and eight MTA subway lines.

RECENT CAPITAL IMPROVEMENTS
Replaced BMS system, exterior louvers, installed VFD's on all motors greater than 100 hp. Existing TEC perimeter controls will be replaced with new FEC's.

AMENITIES
24/7 building access, on-site property management, concourse level access to Rockerfeller Center,1271 Avenue of the Americas, 1301 Avenue of the Americas, and 787 Seventh Avenue.

CONSTRUCTION DETAILS

NUMBER OF FLOORS
42 floors

FLOOR LAYOUT
Functional floor plates with 20'-6" column spacing along 6th Avenue, and 27'-6" along 51st St.

TYPICAL FLOOR SIZE
Flexible floor sizes ranging from 28,963 SF - 75,865 SF (Tower/Bustle)

TYPICAL SLAB HEIGHTS
Typical slab-to-slab height 12'-3", 20' for the Lobby.

CONSTRUCTION CLASS
Class-1 Fireproof

FOUNDATION
Reinforced concrete

FRAME
Structural steel columns and beams.

DECK
Reinforced concrete slab topped with two-inch fill layer

DESIGN LOAD
Live loads of 100 PSF

SETBACKS
Setback is located on the 12th floor

ENTRANCES & LOBBIES
Tenants and guests enter via Sixth Avenue, 51st and 52nd Streets.
The 51st Street entrance remains open after business hours. The loading dock is located on 52nd Street. It is served by the freight elevator and loading dock corridor, and can accommodate four (4) trucks at a time.

EXTERIOR FINISH
Glass curtain wall

ROOF
Built-up roofs with stone ballast

HVAC

HOURS OF OPERATION
Standard hours of HVAC operation are 8 a.m. to 6 p.m., Monday through Friday.

CONTROLS
The building utilizes a TMBA/Distech Niagara Building Management System (BMS).

EQUIPMENT ROOMS
The main equipment room is located on Sub cellar (SC) level. Additional equipment is located on floors 15M, 40, and 41.

SUPPLEMENTAL HVAC
The tenants provide their own Supplemental HVAC.

VENTILATION SYSTEMS
Ventilation air is provided throughout the building via three main fan rooms located on Sub cellar (SC) Level, 15th Floor, and 40th – 41st floors. These fans feed constant volume interior and perimeter fans.

AIR CONDITIONING
Chilled water is supplied to all fans and to the upper and lower secondary water systems during the cooling season by four (4) 1,265-ton York centrifugal chillers. Each are driven by a Murray Steam Turbine. There is a four (4)-cell Marley cooling tower rated for 5,100 tons on the 40th floor roof. Two (2) cells are winterized.

HEATING
Heating is generated by steam supplied by Con Edison by means of a secondary water system which supplies hot water to perimeter window induction units. Additional heat can be provided by preheat and reheat steam coils in the fans.

TELECOMMUNICATIONS

GENERAL
WIRED – Platinum Certified. Multiple points of entry for redundancy and resiliency. Additional telecommunication riser space to accommodate new ISP's.

PROVIDERS
Teleport, Abovenet, Light Tower, Optimum, Level3

ELECTRICITY

GENERAL
Each floor is designed to allow for eight (8) watts/USF, exclusive of base building air conditioning.

METHOD OF MEASURING TENANT CONSUMPTION
Tenants are sub-metered. Costs related to base building electric consumption are reflected via operating expenses.

ELECTRIC CLOSETS
There are four (4) electrical closets on floors SC-15M.two (2) on floors 16-40.

ADDITIONAL POWER
Additional electric can be made available at Tenant's expense, subject to Landlord's review of load study and Tenant's requirements.

LIFE SAFETY

STAIRWELLS
There are a total of seven (7) stairwells that provide for emergency egress. These stairwells are monitored daily and adhere to all Local Law 26 regulations.

CLASS E SYSTEM
The building is equipped with an addressable Notifier "Class E" fire alarm system with audible alarms, elevator recall functionality and fireman's service, hard-wired smoke detectors, strobes, speaker strobes and exit signs. The central alarm system monitors smoke detectors, fire sprinkler/standpipe flow, and pull stations; alerting the local fire department and a monitoring company should an alarm arise.

SPRINKLER SYSTEM
The building is 100% sprinklered and features a combination of a four-riser sprinkler/standpipe system, 7,000 and 8,000-gallon reserve tanks, three (3) fire pumps, and four (4) exterior combination sprinkler/standpipe Siamese connections. Standpipe hose racks are located on each floor of Stairways A, B, F, & G.

ELEVATOR

MANUFACTURERS
Otis

ELEVATOR SIZES
The service elevators are 100" wide x 66" deep x 108" high with a weight capacity of 5,000 lbs.

NUMBER OF ELEVATORS
The building has a total of thirty-four (34) passenger elevators and five (5) service elevators. Two (2) escalators serve the Lobby and C level.

BANKS	FLOORS SERVED	NO. OF ELEVATORS PER BANK
"L" Bank	Lobby-7th fl	6
"M" Bank	Lobby, 7th fl-15th fl	8
"N" Bank	Lobby, 15th fl – 24th fl	8
"O" Bank	Lobby, 2nd fl, 24th fl-30th floor	6
"P" Bank	Lobby, 30th floor-38th floor	6

**Transfer floors include 7, 15, 24 and 30.*

SECURITY

GENERAL
The building is monitored via 24/7 uniformed security guards stationed at the lobby concierge desk, a fully integrated CCTV, visitor management and turnstile access card system, and loading dock master.

PLUMBING

SANITARY SYSTEM
The sanitary system utilizes energy efficient fixtures.

Domestic Water
Two (2) New York City water mains supply water up to a single 10,000 gallon steel suction tank on SC Level. Water is pumped from SC level to a 21,600 gallon tank (with 8,000 gallon fire reserve) on the 42nd floor and to a 16,300 gallon tank (with 7,000 gallon fire reserve) on the 16th floor. Domestic hot water is provided by steam-to-domestic hot water tube-in-shell heat exchanger located in the sub-cellar.
